

QUICKVIEW  
360

# 1 MANHOLE EVERY 5 MINUTES

Manhole inspection doesn't have to be costly and tedious. With the Quickview 360, a single operator can inspect up to 80 manholes per day. Results stream to the cloud for easy storage, sharing and analysis.

The Quickview 360 captures HD panoramic video, can use AI to automate defect and feature coding, and generates a report. It also delivers a full 3D model than can be measured and annotated.

► AI CODING OF OBSERVATIONS\*

► REPORTS STREAMLINED

► WIRELESS UPLOAD TO CLOUD

► VIRTUAL PAN/TILT VIDEO FOOTAGE

► 3D MODEL WITH MEASURING TOOLS

\*additional WiCan services required

# STREAMLINE MANHOLE INSPECTION

telescoping  
30' pole

full-day  
rechargeable  
battery

twin  
cameras  
for 360-deg  
footage

super-bright  
LED lamps

Wi-Fi  
communication  
with tablet app

rangefinder  
to measure  
depth and  
guide descent

## KIT CONTENTS

camera head • camera case • camera sleeve  
camera cradle • charger • 30' telescoping pole  
tablet with field case • tablet app  
1-year WinCan Web Flex subscription

Enter basic inspection details like asset ID, inspector, address, etc.

1 > 2

Lower camera into manhole, following prompts from app.

4 < 3

Review footage on WinCan Web with virtual pan/tilt. Analyze, edit and share inspections; download reports.

When done, upload inspection to WinCan Web via wireless broadband.

5

Measure, annotate and export a 3D model of the manhole.
